"Appropriate and useful classroom material..."

**Committee for The Los Angeles County Office of Education**

"This well-produced examination of an underground Art form, explained by the Artists who created it will add a new dimension to Art Classes and to Library Video Collections.

We recommend its use in High School and College Art Classes."

**School Library Journal**

"As either Art instruction or Social Document this is a worthy addition, and is therefore recommended."

**Video Librarian**

"An unusual take on an often maligned art form, this video will inspire art students."
